

GREEN ABERDEEN 40mm

Artificial grass with memory effect

Characteristics

MAINTENANCE TIPS:

- Once the grass has been unrolled, let it rest for at least 24 hours before installing it.
- Once installed, brush the grass from time to time, depending on the use it is given.
- For a better result, use a special brush for artificial grass such as the BRUSHY model from Nortene.
- To remove dust, sand or other small residues present in the hair, a conventional vacuum cleaner can be used.
- Apply the CLEAN cleaner and the Nortene FRAGRANCE to give it an unbeatable appearance.
