

MAGUS

Pointed wooden stake

A pile made of pine with an impregnated surface, making it weather-resistant and long-lasting. Suitable for building smaller fences, creating garden support systems, and supporting newly planted trees.

Benefits

- Versatile: excellent as a fence post, for livestock, for agricultural plantations or as a plant support.
- Durable and weatherproof, as it is impregnated under pressure, it is resistant to rot, mold and pests.
- Easy to install, one side is pointed, so it is easier to stick into the ground, even in rocky soil.
- A stable fence can be built from it, and an aesthetic and strong structure can be created by combining it with wire mesh, game netting or wooden slats.
- Suitable for decorative and DIY purposes, it can also be used to make support systems, pyramids and other structures.
- Ideal for long-term outdoor use, it maintains its stability and structure without maintenance.

Characteristics

- Material: Pine
- Surface treatment: Wood impregnation with autoclave process (III)
- Color: natural
- Product made in the EU
