

GREEN SINTRA 20 mm

Durable yet affordable artificial grass

SINTRA 20 mm artificial grass is a durable and cost-effective solution for balconies, terraces and other high-traffic outdoor areas. Its short fiber length makes it resistant to wear and tear while requiring minimal maintenance. Its aesthetic appearance ensures long-term natural-looking green surfaces.

Benefits

- Durable and hard-wearing design for heavy use.
- Affordable solution that delivers quality.
- Short pile length for outstanding abrasion resistance.
- Low maintenance, easy to clean.
- Two shades of green and brown for a natural look.
- Ideal choice for smaller spaces such as balconies and terraces.
- Long 8-year warranty.

Characteristics

SPECIFICAL FEATURES:

- Fiber material: PE + PP (Polyethylene + Polypropylene)
- Height: 20 mm
- DTEX: 8.800 (± 3%)
- Stitch count: 15.750/m² (± 100)
- Fiber shape: C-shaped
- Total weight: 1. 7 kg/m²
- Number of cross stitch points per 10 cm: 15/10
- Colours: 3 green + 2 brown
- UV protection: Yes
- Warranty: 8 years

INSTALLATION TIPS :

- After the grass has been rolled out, allow it to rest for at least 24 hours before starting installation.
- For better results, use a special artificial grass brush, such as the Nortene BRUSHY model.
- A conventional vacuum cleaner can be used to remove dust, sand or other small debris from the grass.
- It is not recommended to install artificial grass in areas where glass or metal surfaces receive direct sunlight.
- Sunlight reflecting off glass can cause high

temperatures and can burn the artificial grass due to the magnifying effect.
