

BAMBOO

Plain bamboo cane

The stake's function is to support a plant or flower at the beginning of its growth. Placed beside the plant and secured with a specific tie, the stake is indispensable. The natural bamboo stake, in addition to performing its function wonderfully, is made from a natural and aesthetically pleasing product: bamboo.

Benefits

Supports the growth and development of plants. The stake acts as a guide for the plant's vertical growth, ensuring proper distribution.

Characteristics

Made from natural bamboo.
Supplied in small bundles.
Available in different sizes and diameters to suit any type of plant.

Ref.	Size.	'*Bales	Packaging (pieces)
