

GLUE

Connector strip adhesive

MADE IN SPAIN

If you want your artificial grass to last, note that glue is indispensable to affixing the grass rolls. Recommended with the BRAND ribbon to fit the rolls.

Benefits

A fast-drying, very strong glue that comes in green and brown. It can also be used on wet surfaces. Maximum UV radiation and weather resistance. Contains no iso-cyanate, silicon or solvents. Can be used on various surfaces indoors and outdoors: concrete, bricks, ceramics. No unpleasant odour. No need for gloves.

Characteristics

Water-resistant polymer. Dosage: 100-200 g/m2 depending on the porosity of the surface. We recommend 1 flask for one BAND fixing ribbon (0.3x10 metres). Any excess glue should be immediately cleaned off with acetone. Remove mechanically once dried. Ideal installation temperature: +5˚C-50˚C. Wait for 24 hours before stepping on the artificial grass.

IMPORTANT: Consume within 12 months after production. See production lot at the base of the packaging.
