

FLEXIGREEN

Extendable trellis with polyethylene leaves

UV RESIST · PE · PVC

You do not necessarily have green fingers but you want a low-maintenance decorative plant? This extensible plastic trellis, combined with synthetic foliage, will provide you with the decorative touch you want.

Benefits

To instantly decorate a wall, a balcony or create a separation. This extendible plastic trellis is dressed in green polyethylene leaves. Greened, it then becomes a decorative panel to hide a unsightly wall. Secured to a balcony, this trellis will be act as a privacy screen and at the same time provide a green touch. A product that is very easy to put in place for an instant result. Its 100% plastic structure gives it good longevity.

Characteristics

PVC trellis, brown, 24 + 24 slats. Polyethylene leaves, of different sizes, green colour. Leaves firmly held in place with a green plastic tie, fasted to the rivets along the slat.
