LUCILY

Metal animal figures stuck in the soil

In the image of butterflies that come to visit our gardens, the Lucily figurines to plant are light and airy. Butterflies, dragonflies and owls will fill your garden. At nightfall, just like glow worms, you will be able to see them shine.

Benefits

Stylised figurines in metal, to plant in a flower bed, in the rock garden, or simply in a pot. The phosphorescent elements will provide subtle illuminated touches at nightfall. The butterflies and dragonflies flap their wings when the wind blows.

Characteristics

Metal and plastic. 8 different models: owls, dragonflies, butterflies. Dimensions: 0.60 m (approx), depending on model.
