

BORDER FLEXI

Plastic bed and lawn edging

Extra flexible bed edging so that curves and circles are no longer a problem. Thanks to the flexibility of our new generation edging, it is extremely easy and quick to install. It is the perfect solution for garden construction, subsequent landscaping, and bed edging.

Benefits

- Perfect for building flower beds, small garden paths, pedestrian walkways, lawn borders, as it aesthetically separates different surfaces
- grass, mulch, gravel
- from each other.
- Fits naturally into its environment
- The cut-off spikes (FIXING PEG FLEXI) provide secure attachment: 2-3 pieces are required for straight sections, and 3-6 pieces for curved or circular borders per meter.
- Provides good support for pedestrian paving.
- Provides a variety of design solutions (straight, curved circle and oval).
- Resistant to UV radiation.
- Its material is more flexible, making curves easier to create.
- Easier to install.
- Made of high-quality 100% recycled plastic.
- No cutting is required when creating curves.

Characteristics

- Material: 100% recycled HDPE
